

Claims

1. A nasal passage cleaning composition comprising a salt and water solution, an antiseptic, an analgesic, a decongestant, a moisturizer and a non-steroidal anti-inflammatory.

2. The composition of Claim 1 wherein the antiseptic is selected from the group consisting of tea tree oil, camphor, glycerine, alcohol, zinc sulfate, and combinations thereof.

3. The composition of Claim 1 wherein the decongestant is selected from the group consisting of n-acetyl-L-cystine, potassium alum, zinc sulphate and combinations thereof.

4. The composition of Claim 1 wherein the antipruritic analgesic is selected from the group consisting of methyl salicylate, camphor, and combinations thereof.

5. The composition of Claim 1 wherein the moisturizer is selected from the group consisting of glycerine, balsam tolu, tea tree oil, gum benzoin, and combination thereof.

6. The composition of Claim 1 further comprising an aromatizer selected from the group consisting of tea tree oil, menthol, peppermint oil, and combinations thereof.

7. The composition of Claim 1 wherein the non-steroidal anti-inflammatory is selected from the group consisting of methyl salicylate, zinc sulphate, and combinations thereof.

8. A method of cleaning nasal passages comprising applying a composition having a salt and water base, and a mucolytic agent (n-acetyl-L-cystine) and methyl salicylate, an antiseptic, an analgesic, a decongestant, a moisturizer and a non-steroidal anti-inflammatory to the nasal passages.

9. The method of claim 8 wherein the composition is applied by spraying, dropping or douching the nasal passages.
